

PROGRAMMING SETTING

1. Click the programming to enter the programming interface
2. Select the period of time of 7-day programming, press up or down to set temperatures in the different periods of time.
3. Enter the programming interface and then click the 7 day key
4. Click the date to be edited and confirm it.

* If you need to stay out temporarily:
The temperature can remain at 16°C, the energy-saving icon turns green and is on
